

Claims

5 1. A steering wheel comprising a hub, a steering wheel rim, at least one spoke connecting said hub and said steering wheel rim, and at least one decorative element, at least one of said steering wheel rim and said spoke having a skeleton and a sheathing surrounding said skeleton, said skeleton having a recess and said decorative element having a fastening element which projects into said recess.

10 2. The steering wheel according to Claim 1, wherein said recess is constructed as a through-hole.

 3. The steering wheel according to Claim 1, wherein said fastening element connects said decorative element with said skeleton.

 4. The steering wheel according to Claim 3, wherein said fastening element has detent means.

15 5. The steering wheel according to Claim 1, wherein said sheathing has a recess which, as seen in extension of said recess in said skeleton, extends as far as to an outer edge of said sheathing.

 6. The steering wheel according to Claim 5, wherein said fastening element projects through said recess and is fixed in said sheathing.

20 7. A steering wheel comprising
 a hub,
 a steering wheel rim,

 at least one spoke connecting said hub and said steering wheel rim, at least one of said steering wheel rim and said spoke having a skeleton and a sheathing
25 surrounding said skeleton, said sheathing consisting of two shell parts which together surround said skeleton, said skeleton having a recess,

and at least one decorative element having a fastening element which projects into said recess.

8. A steering wheel comprising

a hub,

5 a steering wheel rim,

at least one spoke connecting said hub and said steering wheel rim, at least one of said steering wheel rim and said spoke having a skeleton and a sheathing surrounding said skeleton, said skeleton having a recess and said sheathing having a recess which, as seen in extension of said recess in said skeleton, extends as far
10 as to an outer edge of said sheathing,

and at least one decorative element having a fastening element which projects into said recess of said skeleton,

a plug being provided by means of which said recess in said sheathing is closed externally at least partially.

15 9. A steering wheel comprising

a hub,

a steering wheel rim,

at least one spoke connecting said hub and said steering wheel rim, at least one of said steering wheel rim and said spoke having a skeleton and a sheathing surrounding said skeleton, said skeleton having a recess, and
20

at least one decorative element having a fastening element which projects through said recess in the steering wheel and is fixed in said sheathing.
